

client/src/shape/files  
/txt/LoadShapeComposedShapeTXTCOR.h

```
graph BT; A["client/src/shape/files  
/txt/LoadShapeComposedShapeTXTCOR.cpp"] --> B["client/src/shape/files  
/txt/LoadShapeComposedShapeTXTCOR.h"]; C["client/src/shape/files  
/txt/VisitorSaveFileTXT.cpp"] --> B;
```

The diagram illustrates a file dependency structure. At the top is a gray-shaded box representing a header file: 'client/src/shape/files /txt/LoadShapeComposedShapeTXTCOR.h'. Below it are two white boxes representing source files. The left box is 'client/src/shape/files /txt/LoadShapeComposedShapeTXTCOR.cpp' and the right box is 'client/src/shape/files /txt/VisitorSaveFileTXT.cpp'. Blue arrows point from each source file box up to the header file box, indicating that both source files include the header.

client/src/shape/files  
/txt/LoadShapeComposedShapeTXTCOR.cpp
